

Health and life sciences research for the government agencies that safeguard American health.

A physician-led research firm. The work is applied research and development in the life and health sciences (541715) and biotechnology (541714), with scientific and technical consulting (541690) alongside it. Software, data engineering and secure computing are how that research is delivered, not separate service lines.

CORE COMPETENCIES

- **Life & Health Sciences R&D (541715, primary)** — clinical outcomes research, epidemiological and statistical modeling, behavioral health research, and study design.
- **Biotechnology R&D (541714)** — computational biology, genomics and microarray analysis, bioinformatics method development, population-scale processing of biological data.
- **Scientific & Technical Consulting (541690)** — study design and methodology review, data governance and interoperability strategy, scientific and regulatory documentation.

DIFFERENTIATORS

- Physician-led at the principal level: the sole owner is a practicing psychiatrist, so clinical judgment sits with the decision-maker — directly relevant to VA and DHA behavioral health research, including principal investigator capability.
- SBIR/STTR-eligible R&D carried from study through to a working result rather than handed off at the report.
- Compliance engineered in from the first commit: HIPAA, FedRAMP-aligned architectures, NIST SP 800-171 aligned controls with CMMC Level 2 readiness, Section 508 / WCAG 2.2 AA.

PAST PERFORMANCE

- None to date. The firm has not yet performed a federal contract or subcontract.

PRINCIPAL

Dr. Marcia Churchwell, MD — Founder & Principal

OPERATIONS

Sole owner/operator: the principal performs or directs all work.

COMPANY DATA

UEI
J4PHCWSJ4K57

CAGE
24GM0

OWNERSHIP
Service-disabled
veteran-owned, woman-owned,
minority-owned

NAICS
541715 (primary), 541714,
541690

PSC
AN11, AN12, B544, R425

CERTIFICATIONS
SBA SDVOSB and EDWOSB —
certifications in progress (MySBA
Certifications)

MISSION FOCUS

- VA (OMHSP, VHA innovation)
- DHA
- NIH/NIMH (SBIR)

Agencies this practice is built for.
